SUMMARY of the Hyogo Framework for Action 2005-2015: Building the Resilience of Nations and Communities to Disasters (Hyogo Framework)

Expected outcome, strategic goals and priorities for action 2005-2015

Expected Outcome

The substantial reduction of disaster losses, in lives and in the social, economic and environmental assets of communities and countries

Strategic Goals

The integration of disaster risk reduction into sustainable development policies and planning Development and strengthening of institutions, mechanisms and capacities to build resilience to hazards

The systematic incorporation of risk reduction approaches into the implementation of emergency preparedness, response and recovery programmes

Priorities for Action

- 1. Ensure that disaster risk reduction (DRR) is a national and a local priority with a strong institutional basis for implementation
- ! DRR institutional mechanisms (national platforms);
- designated responsibilities
 ! DRR part of development policies and planning, sector wise and multisector
- ! Legislation to support DRR ! Decentralisation of

Key Activities

- responsibilities and resources Assessment of human
- resources and capacities
- Foster political commitment ! Community participation

DRR= disaster risk reduction

- - ! Risk assessments and maps, multi-risk: elaboration and dissemination Indicators on DRR and vulnerability

2. Identify, assess and monitor

disaster risks and enhance early

- Data & statistical loss information
- Early warning: people centered;
- information systems; public policy Scientific and technological development; data sharing, space based earth observation, climate modeling and forecasting; early
- warning ! Regional and emerging risks

- 3. Use knowledge, innovation and education to build a culture of safety and resilience at
- ! Information sharing and cooperation; ! Networks across disciplines and regions: dialogue
- ! Use of standard DRR terminology ! Inclusion of DRR into school curricula, formal and informal education
- Training and learning on DRR: community level, local authorities, targeted sectors; equal access
- ! Research capacity: multi-risk; socioeconomic; application
- Public awareness and media

- 4. Reduce the underlying risk factors
- ! Sustainable ecosystems and environmental management
- ! DRR strategies integrated with climate change
- adaptation
- ! Food security for resilience ! DRR integrated into health sector and safe hospitals

- Protection of critical public facilities
 Recovery schemes and social safety- nets
- Vulnerability reduction with diversified income options Financial risk-sharing mechanisms
- Public-private partnership
- ! Land use planning and building codes ! Rural development plans and DRR
- ! Disaster management capacities: policy, technical and institutional
 - capacities ! Dialogue, coordination & information
 - exchange between disaster managers and development sectors

5. Strengthen disaster preparedness

for effective response at all levels

- ! Regional approaches to disaster response, with risk reduction focus
- ! Review & and exercise preparedness and contingency plans
- Emergency funds
- Voluntarism & participation

Cross Cutting Issues

Multi-hazard approach

Gender perspective and cultural diversity

Community and volunteers participation

Capacity building & technology transfer

Implementation and Follow-Up

In order to achieve the goals and act upon the priorities identified in this Framework, the following tasks have been identified to ensure implementation and follow-up by States, regional and international organizations in collaboration with civil society and other stakeholders. The ISDR partners, in particular the Inter-agency Task Force on Disaster Reduction and secretariat, are requested to assist in implementing this Framework for Action.

General Considerations

Implementation by different stakeholders, multi-sectoral approach; participation of civil society (NGOs, CBOs, volunteers), scientific community & private sector is vital

States primarily responsible; an enabling international environment is vital, incl. strengthened regional capacities

Build multistakeholder partnerships Particular attention to:

- Small island developing States: Mauritius Strategy

Least developed countries;

States, regional and international organizations to foster coordination among themselves and a strengthened International Strategy for Disaster Reduction (ISDR) Follow-up integrated with other major conferences in fields relevant to DRR; reviews as appropriate

Actors

States

- Designate national coordination mechanisms for the implementation and follow up, communicate to the ISDR secretariat:
- ! National baseline assessments of the status of DRR; ! Publish and update a summary of national programme for DRR

Oritical

- including international cooperation; ! Develop procedure for reviewing national progress including
- systems for cost benefit analysis and ongoing monitoring on risk; ! Consider acceding to, approving or ratifying relevant international
- legal instruments and to make sure they are implemented; Promote the integration of DRR with climate variability and climate change into DRR strategies and adaptation to climate change; ensure management of risks to geological hazards.

Regional Organizations and Institutions

- ! Promote regional programmes including for technical cooperation, capacity development, the development of methodologies and standards for hazard and vulnerability monitoring and assessment, the sharing of information and effective mobilization of resources;
- ! Undertake and publish regional and sub-regional baseline assessments;
- Coordinate and publish reviews on progress and support needs, and assists countries in preparation of national summaries:
- Establish specialized regional collaborative centers;
- ! Support the development of regional mechanisms and capacities for early warning, including for tsunami

International Organizations (including UN System and IFIs)

- Engage in the implementation of the ISDR by encouraging integration of DRR into humanitarian and sustainable
- Strengthen the capacity of the UN system to assist disaster-prone developing countries in DRR and implement
- measures for assessment of progress; Identify actions to assist disaster-prone developing countries in the implementation of the Hyogo Framework, ensure their integration and that adequate funding is allocated; assist in setting up national strategies and programmes for DRR; Integrate actions into relevant coordination mechanisms (UNDG, IASC, RCs and UN Country Teams);
- Integrate DRR into development assistance frameworks such as CCA/UNDAF, PRSP; In collaboration with networks and platform support: data collection and forecasting on natural hazards and risks; early warning systems; full & open exchange of data;
- Support States with coordinated international relief assistance, to reduce vulnerability & increase capacities;
- Strengthen international mechanisms to support disaster stricken States in post-disaster recovery with DRR approach Adapt & strengthen inter-agency disaster management training for DRR and capacity building.

ISDR (Inter-Agency Task Force on Disaster Reduction & secretariat)

- ! Develop a matrix of roles and initiatives in support of follow/up to the Hyogo Framework;
 ! Facilitate the coordination of effective actions within the UN system and other international and regional entities to support the implementation of the Hyogo Framework, identify gaps, facilitate processes to develop guidelines and cy tools for each priority area;
- policy tools for each priority area; In broad consultation, develop generic, realistic and measurable indicators. These indicators could assist States in measuring progress in the implementation of the Hyogo Framework;
- Support national platforms & regional coordination:
- Register relevant partnerships with Commission on Sustainable Development;
- Stimulate the exchange, compilation, analysis and dissemination of best practices, lessons learnt; Prepare periodic review on progress towards achieving the objectives of the Hyogo Framework and provide reports to the UNGA & other UN bodies

Resource Mobilization: States, Regional and International Organizations

- ! Mobilize resources and capabilities of relevant national, regional and international bodies, including the UN system; ! Provide and support the implementation of the HFA in disaster prone developing countries, including through financial and
- technical assistance, addressing debt sustainability, technology transfer, public-private partnership and North-South and South-South cooperation:
- ! Mainstream DRR measures into multilateral and bilateral development assistance programmes;

- ! Provide adequate voluntary financial contribution to the UN Trust Fund for DR to support follow-up activities to Hyogo
- Framework; review usage and feasibility for the expansion of this fund;

 ! Develop partnership to implement schemes that spread out risks, reduce insurance premiums, expand insurance coverage and increase financing for post-disaster reconstruction, including through public and private partnerships. Promote an environment that encourages a culture of insurance in developing countries.
