**E. Willard Miller** is Professor of Geography and Associate Dean for Resident Instruction, Emeritus, The Pennsylvania State University. Dr. Miller received his A.M. degree from the University of Nebraska and Ph.D. from Ohio State University. In 1948-49 he was President of the American Society for Professional Geographers and in 1966-68 President of the Pennsylvania Academy of Science. In 1990 Dr. Miller received the Honors Award from the Association of American Geographers. He is an authority on minerals and environmental problems, having written more than 100 articles and 30 books on these fields.

**Robert F. Schmalz** is Professor of Geology (emeritus) at The Pennsylvania State University. Trained as a chemical oceanographer, his interests include a wide range of chemical reactions between geological materials and natural waters at low temperatures. He is a Fellow of the Geological Society of America, the American Association for the Advancement of Science, and the Explorers Club. Dr. Schmalz has been engaged in research on problems of low-level radioactive waste management since 1981 and has published extensively in scholarly journals. Dr. Schmalz holds bachelor's, master's and doctoral degrees in Geology from Harvard University.
