Overview

The Fifth Regional Platform for Disaster Risk Reduction in the Americas (RPA), hosted by the Government of Canada and the United Nations Office for Disaster Risk Reduction (UNISDR), will be held in Montréal, Quebec, on March 7 - 9, 2017.

The RPA will be the first to be held since the adoption of the Sendai Framework for Disaster Risk Reduction (DRR) 2015-2030 in March 2015.

The main focus will be on identifying how governments, civil society leaders, technical and scientific institutions, the private sector and media can drive the implementation of activities and actions to meet the expected targets of the Sendai Framework while building capacity in the region.

A Ministerial and High-Level Authorities meeting will also take place during this Fifth Session. Both meetings, the RPA and the High-Level segment, will mark the first opportunity for governments and stakeholders in the Americas to discuss and agree on a Regional Action Plan to support the implementation of the Sendai Framework in the Americas.
